

ASHAROKEN NEWS

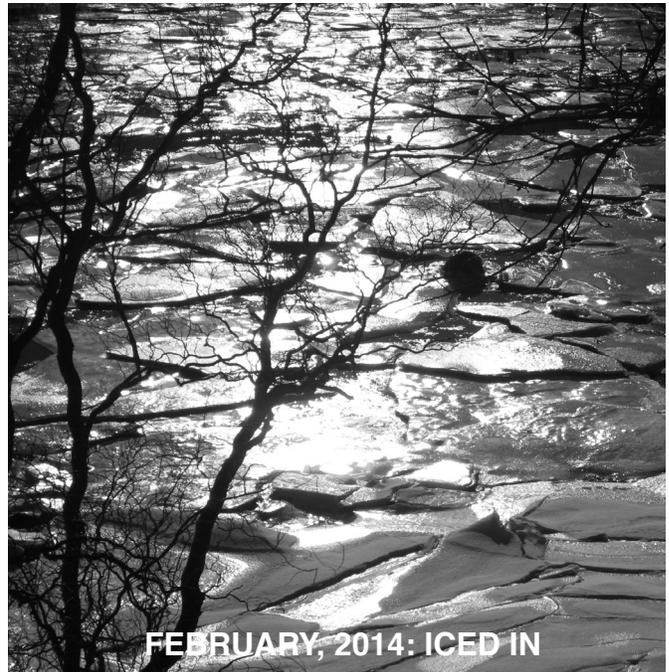

ASHAROKEN BUDGET 2014-2015

The proposed budget for 2014-2015 maintains all of our current services, puts money aside for Asharoken's future needs and keeps Asharoken on a strong financial footing. It will reflect current and anticipated revenues and expenditures as well as a modest tax rate increase of 1.5% as needed to balance our budget..

I would like to highlight a few of the components of the proposed budget that have changed from last year. Our assessment roll for 2014 has decreased approximately 1%, which has a direct effect on the Village's tax rate. This assessment reduction is primarily due to small claims assessment review settlements and building projects in progress. Fortunately, this is a temporary trend which is expected to reverse itself next year. Our contractual salaries, snow removal costs, fire contract costs and needed police equipment are several of the major expenditures that have increased. The Village's insurance costs, infrastructure reserves, pension costs and police car repairs expenditures have decreased helping offset some of the overall increases. Several of our income line items were modified to better reflect anticipated revenues.

The Board is proposing a tax rate increase of 1.50%. A home, for example, assessed at 30,000 will incur a tax increase of \$51.00. The 1.50% tax rate increase is the lowest since 2005 and falls well below the average Village tax increase of 3.7% since 2005. In addition, the proposed tax levy of \$1,631,746 falls under the New York State Tax Levy cap.

The complete proposed budget and other

supporting documents are available for review at Asharoken.com and at Village Hall. The Village will hold a public hearing on the proposed budget on Tuesday, April 1st, at 7:30 PM at the National Grid Power plant. Please remember that photo ID is required to enter the grounds. Written comments can be sent to mayorgregletica@gmail.com or to Village Hall.

I would like to thank Village Clerk Nancy Rittenhouse, Treasurer Emily Hayes, and the Board of Trustees for their hard work in helping to prepare the proposed budget. It is a real challenge to prepare a budget that does what is needed for the Village, is fair to our residents and stays within the constraints of New York State Law. I feel confident that this budget does just that.

Mayor Greg Letica

MAYOR'S LETTER

Dear Neighbors.

Although for most of the winter it seemed as if the Village was the perfect place to film the next Ice Age movie, we have to be thankful that we were spared any major Nor'easters. The emergence of the crocuses, daffodils and tulips will be a great contrast to the snow and ice.

Asharoken received excellent news in February. What a good start for the New Year!

Fiscal Stress Test Aced

The New York State Comptroller's office has implemented a statewide fiscal monitoring system to identify local governments experiencing fiscal distress. The Village of Asharoken was classified as **No Designation** with a score of 0.0% as of December 31st 2013. The Village's result is the highest ranking possible and indicates that Asharoken is in a very good position financially. According to *Newsday*, Asharoken is one of only eleven villages on Long Island to receive a perfect score.

The statewide monitoring system identifies local governments that are experiencing fiscal distress. The goal of the system is to inform municipal leaders and taxpayers of the economic and budgetary challenges facing their locality so that actions can be taken to avoid fiscal crisis.

Village Awarded Grant

The Village of Asharoken was awarded a \$27,000 grant from Justice Court Assistance Program. This money will be used for the reconstruction of Village Hall. Village Clerk Nancy Rittenhouse was instrumental in getting the Village this needed grant. The Village is awaiting news on two other grants that we have applied for. The Village has applied for a FEMA Hazard Mitigation Grant in the amount of \$73,875. Additionally, through the office of Senator Carl Marcellino, the Village applied for a \$50,000 NYS and Municipal Facilities Program Grant. Both of these grants, if awarded, are for the reconstruction of Village Hall.

This snowy winter has so far seen the Village use about 2/3rds of its snow removal budget. Like other communities, the road has

Please turn to Page Eight

NOTES FROM BIG BLUE

By Barry Bradley

Be A Good Citizen

New York State enacted its Recycling Law in 1992. All municipalities must enforce this.

Recycling bottles and cans costs the Village \$28 per ton. Recycling newspaper and cardboard enables the Village to **receive** 61 cents per ton depending upon the rate on that date. **Regular trash pick up costs \$80 a ton, so adding bottles, cans, papers and cardboards means the Village has to pay more. PLEASE RECYCLE.**

On May 28, 2010, New York State passed the E-Waste Recycling Law. Computers, TVs, and other small electrical equipment **must** be taken to the Town of Huntington Recycling Center at 641 New York Avenue. They accept E-Waste Tuesday through Saturday, 8 AM to 4 PM. Other household hazardous waste should be taken there Tuesday through Saturday between 9 AM and 3 PM. For more information, call 631-427-6377.

Please place your refuse and recycling containers at the curb by 8 AM. Do **not** put it out the night before. The total weight of a single container should be no more than 50 pounds.

Yard waste pickup begins in April. (See calendar on back page.) Here are the rules:

- Materials must consist of leaves, bundled branches, and gardening debris.
- Grass clippings, lumber, and stumps cannot be picked up.
- All yard waste must be stored in clear plastic trash bags.
- No more than eight bags will be picked up each month.
- All bags must be placed at curbside.
- Please don't put out your bags until the night before pick-up date.

Please consult the Asharoken Village Website at www.Asharoken.com and look under tab Government Services for specific information on what is and is not recyclable.

POLICE REPORT

By Ray Mahdesian,
Officer-in-Charge

Farewell Crown Vics

The most popular patrol vehicle in police departments across the nation for decades is no longer in production. Ford Motor Company this past year discontinued manufacturing the classic Crown Victoria Police Interceptor, leaving departments searching for a suitable alternative.

After much research, Asharoken's police department decided upon the Dodge Special Service Durango to replace two Crown Vics that were no longer able to be reasonably repaired. One car was 12 years old, and the other was 8 years old, each

Police Commissioner Mel Ettinger and Officer Ray Mahdesian

having well over 100,000 hard miles.

The two new vehicles have all-wheel drive, which will allow officers to respond safely to serve the Village in all types of weather, something that was not possible in the Crown Vics. The Dodges also provide more room for equipment and personnel.

The purchasing process for acquiring new vehicles is strictly regulated by law. Accordingly, the Village advertised the specifications required for the new police vehicles and vendors were invited to bid. Huntington Jeep Chrysler Dodge was awarded the bid by the Board of Trustees, actually coming in lower than the New York State contract price, a definite saving for the village.

The cars were then purchased from the Village's

Please turn to Page Four

VILLAGE ELECTION

Remember To Vote

The 2014 General Village Election for officers will be held on Tuesday, June 17, 2014, from noon-9pm at the Eaton's Neck Fire Department (55 Eaton's Neck Road). The location is subject to change. There are four positions up for election: Trustee, a two (2) year term; Trustee, a two (2) year term; Mayor, a two (2) year term; Justice, a four (4) year term.

Are you registered to vote? Will you need an absentee ballot? Contact the Village Hall for assistance. **The last day for individuals who register with the Suffolk County Board of Elections to be eligible to vote in the Village election is Friday, June 6th, 2014.** To register to vote, an individual must be: a citizen of the United States; at least 18 years of age on Election Day; a proven resident of New York State and Asharoken Village for at least 30 days preceding the election

Voter Registration form and absentee voting information are available at Village Hall or by calling the Suffolk County Board of Elections: 852-4500.

Will you need an Absentee Application?

If they are sent by mail, they must be received by June 10. If by walk-in, Absentee Applications can be handed in to Village Hall until the June 16th deadline. No Absentee Applications can be given or received on Election Day!

THANKS, TONY

Here's a gift good for a whole year! The tide table inserted in this newsletter was created by Tony Wenderoth who has donated these copies to his neighbors. Aware that it's an essential for Asharoken, he was happy to print it and glad to share it with other residents. He explains its provenance, "It's based on the official information about tides in Huntington, which are identical to ours within a minute or two."

POLICE REPORT *continued.*

reserve fund for vehicle replacement. Funds are placed in the reserve account each year so that there will be enough available when we need it. The last time the Village purchased a police car was six years ago when we took delivery of our last Crown Vic in 2008. That car is still in service.

We maintain our police cars carefully. They have to be able to perform under emergency conditions. We need to keep our officers safe, and at the same time we need to be able to apprehend violators and serve the residents promptly in all types of situations. Mindful of taxpayer dollars, we make our vehicles last as long as possible; repair bills and safety considerations dictate the necessity of car replacement.

The arrival of a new police car is always appreciated by our officers, but none was more appreciated than the 2002 Crown Vic and the 2004 Chevy Tahoe. Believe it or not, both these cars were gifts to the village by Steve Bogyay and his sister Anna, both former residents of Asharoken. I have always been amazed at the generosity of Asharoken's residents, and their contributions are certainly a stellar example!

We look forward to serving you well in your new cars!

VIEW FROM THE HARBOR

By Deputy Harbormaster
Barry Bradley

New Boating Rules

A new boating law that will affect all motor boaters will go into effect on May 1st, 2014.

All individuals born on or after 5/1/96 are now required to successfully complete an approved course in Boater Education in order to operate a motor boat. Approved courses include those offered by New York State Parks Department, Coast Guard Auxiliary, the United States Power Squadron, and the Huntington Harbormasters Department. All operators of a P.W.C. (jet ski) must have taken a Boating Safety Course. All operators who are required to complete the boating safety course must carry the certificate with them while operating a mechanically propelled vessel. Students must be at least 10 years of age and have completed a minimum of 8 hours of classroom instruction over a period of years. The law will be phased in to include all the operators of a vessel.

Another new rule for boaters will take effect at the same time. A new program will now permit you to choose to have your Boating Safety Certificate noted on your driver's license. The DMV will maintain a record of those completing the course and automatically place the icon (an anchor) on the license each time it is renewed. Boating Safety Certificates are permanent and do not expire.

VOLUNTEERS NEEDED

The annual Asharoken holiday party will be held on November 1st.

**Please help out with this event.
Call Carole Casamassima at 261-1895.**

BUILDING PERMITS

When are building permits required?

Building Permits are required for the following:

1. New structures or alterations to existing structures
2. Shed, barn, garage, pergola or any accessory structure
3. Swimming pool or tennis court
4. Retaining wall
5. Bulkhead & Stairs
6. Rock Revetment
7. Docks
8. Demolition work
9. Tree removal (See Tree Permit, page 7.)
10. Propane tank installation
11. Chimney & fireplace
12. New driveway & entrance columns
13. Masonry work
14. New windows that require new structural framing
15. Installation of a generator
16. Gas conversion, air conditioning unit
17. Solar panels
18. Alteration of existing attic or cellar for living space
19. Re-roofing where sheathing is replaced, cavity must be inspected and insulation installed. Two-layer maximum per State Building Code.
20. Replacement windows in bedrooms that change the size of window.

Building Permits are not required for the following:

1. Gutters, leaders and siding
2. Replacement of windows and doors that fit existing openings, without requiring new structural framing, (except bedrooms)
3. Fencing: Be sure to place all fencing within your property line
4. Repair of deteriorated exterior floor decking
5. Asphalt driveway, replace or layer over existing (Cutting into the roadway requires a permit)
6. Replacing like-kind fixtures in kitchen or bathroom

Building Application forms are available on the Asharoken website, go to www.asharoken.com Government tab, then permits and applications.

ASHAROKEN.COM IS THE PLACE TO GO

This web site, created by Eric Maffei and Steve Trombetti, provides answers to all your questions about our Village and its scheduled events plus emergency information when required. The larger local community is represented as well. Check it out!

E-MAIL INFORMATION

Asharoken Community Connections

We are continuing to collect E-Mail addresses from all residents within the Village of Asharoken. If you would like to share your e-mail address with us, we will include it in our "E-Mail Contact List". You will then be e-mailed important notices, correspondence from the Board of Trustees, road closure information, trash schedule updates, emergency bulletins, etc. If you have a caretaker or relative whom you feel should be informed of this information, please provide their e-mail address as well. We appreciate your participation. The better we can communicate to our Asharoken Community the better we can serve all of you.

Please either bring the following information to Village Hall or e-mail it to Rittenhousevc@gmail.com:

Name:

Address:

Primary E-Mail Address:

Secondary E-Mail Address:

Phone Number (Optional):

Cell Number (Optional):

VILLAGE REAL PROPERTY TAX BILLS

The 2014-2015 Asharoken Village Tax bills will be sent out on or about May 15th. Village tax bills are sent out once a year, due June 1st thru July 1st without penalty. If you have made any changes with your mortgage company or are now paying your village taxes directly to the Village please contact Village Hall at 631-261-7098 so we may make the necessary corrections.

BIRDING

By Greg Letica

Birds Of Spring

Despite the snow and cold weather the 2014 birding season has begun with a bang. I recorded the 50th species on January 28th. During the last

10 years I have been keeping an annual list. In the past, the earliest date I reached 50 species was February 16th.

One of the highlights was a Great Horned Owl, which could be heard and seen on the hill across the street from Village Hall. Many people also commented to me about the overwintering flocks of Starlings and Robins which, although very common, are not normally seen here in January.

Spring, though, is on its way with the arrival of Grackles, Redwing Black Birds, and Brown Headed Cowbirds on February 23rd. These three species appear to migrate together; usually all of them appear on the same day.

Ospreys should be returning the week after St. Patrick's Day. Many people are eagerly waiting to see if a pair nests and raises chicks on the new nest platform on Asharoken Ave. Last year was a bad year for the Ospreys—for only the second time the pair on Duck Island did not have any chicks.

MAYOR LA GUARDIA SLEPT HERE

Fiorello La Guardia served three terms as Mayor of New York, from 1933 through 1945. A champion of the Progressive Movement, he expanded the work-relief program for unemployed, stabilized the budget, ended corruption, created a new merit-based civil service, and with his Parks Commissioner, Robert Moses, built the West Side Highway, East River Drive, Brooklyn Battery Tunnel, Triborough Bridge, and two airports. He also brought the 1939 World's Fair to New York City. During a 1945 newspaper delivery strike, he read the "funnies" over the radio to the delight of children and adults. (See picture.)

According to *Faded Laurels* by Edward Carr, Fiorello La Guardia rented a summer home at 277 Asharoken Avenue during 1937 and 1938. During his stay, extra telephones were installed so he could run much of New York City from here. Unfortunately, during the Hurricane of 1938, Mrs. La Guardia was trapped in a second floor bedroom. As a result of that experience, the family decided to summer elsewhere in the future.

IT'S PERMIT SEASON AGAIN

Tent Permit

The Board of Trustees must approve the request for a Tent Permit; once approval is complete, the fee must be submitted. Dates of installation and removal must be noted on the permit. Fee is \$10.00.

Mooring Permit

All moorings located in the Bay behind Village Hall require a Mooring Permit. Applications are available at Village Hall. Seasonal fee is \$125.00.

Water Ski Permit

Water Ski Permits are required in order to water ski in the area of Duck Island Harbor. Applications are reviewed and approved by the Village Police Department. Applications are available at Village Hall. Seasonal Fee is \$70.00.

Tree Permit

Tree Permits are required for any deciduous tree cutting that exceeds 45 inches in circumference and any evergreen that exceeds 24 inches in circumference. A tree is measured three feet from the ground and around the trunk of the tree at that point. All trees that are subject to removal must be marked with orange surveyor's tape or a similar method of identification. Tree Permit applications must be approved by the Board for Conservation of the Environment. Trees that are within 15 feet of the perimeter of a structure can be removed without a permit. Please check with the Village Clerk in order to confirm. No Fee is required.

SIGHTINGS

Please send pictures of Asharoken animal, scenic or event sightings with details for inclusion in the next issue. E-mail to joang30@gmail.com. Call 631-261-5897.

MAYOR'S LETTER *continued.*

taken a bit of a beating and many of the pot holes have recently been filled by Town of Huntington Highway and Northport Highway Departments. The section of the roadway between Bevin Road and the Eaton's Neck border is in particular need of repair and the Village is soliciting estimates to re-pave it. Asharoken Avenue is expected to be re-striped this spring.

On January 24th, an extremely cold and windy day, Deputy Mayor Pam Pierce and I took 3 members of the Army Corps of Engineers on a site visit to the Sound-side beach. The Army Corps is continuing to work on finalizing their plan for the beach restoration. On February 26th, Congressman Steve Israel met with Colonel Owens of the Army Corps and discussed the beach restoration project with him.

The Village Hall Project continues moving forward on both the FEMA reimbursement side and on completing the bid package. FEMA has advised us that they are 98% done with their review process and I hope we will get a final answer in the next several weeks. This continues to be a frustrating bureaucratic process and a great deal of patience is required. Hopefully the adage that good things come to those who wait will apply to Village Hall.

In closing, Linda and I would like to wish everyone a very happy Passover and Easter. It will be a real treat to celebrate these two vernal milestones in true spring weather.

Regards,
Mayor Greg Letica

BEACH LOT OWNERS

Platforms, tents, awnings or other structures of any kind are not permitted on any vacant lot. Temporary tents are allowable by applying for a tent permit. All beach items should be removed and stored away after the summer season. Parking on the vacant parking areas opposite Asharoken Beach requires a beach lot parking pass. Beach Lot passes were sent out this week, look for your beach parking passes in the mail. The snow fence will be left up this year throughout the season to help secure the dune, if you need an opening made to get to your beach lot, please give us a call at Village Hall 631-261-7098

SEPTIC SYSTEM & CESSPOOL BASICS

By Doug Adil, R.A.

Building Superintendent and Flood Plain Manager

Our homes typically have either a Septic Disposal System or a Cesspool to dispose of sanitary waste. Depending on the age of the home and whether the system has been replaced (and when) you might have either type. The similarities and differences between these two systems are explained below.

Septic Disposal Systems

Its basic components are the septic tank and the leaching field (soil absorption area). Here is how the system works: Waste flows from the home into the septic tank. Organic solids float to the top and inorganic solids sink to the bottom of the tank. Natural occurring bacteria in the septic tank converts the organic solids to liquid. The clear liquid in between the “solids” and “sludge” layers flows into the leaching field.

How does a Septic Disposal System fail?

Solid buildup is the problem! By not servicing and maintaining your system properly, solids build up within the septic system and flow into the leaching field. This clogs the leaching field and could permanently destroy the field. As well, household cleaners like detergents, toilet cleaners, bleach, and disinfectants kill the natural bacteria in the septic tank. Most systems that fail prematurely are due to improper maintenance.

If you notice any of the following signs or if you suspect your septic system may be having problems, contact a qualified septic professional. The warning signs are:

Odors, surfacing sewage, or wet spots in the drainfield area

Plumbing or septic tank backups (often a black liquid with a disagreeable odor)

Slow draining fixtures

Gurgling sounds in the plumbing system

If you have a well and tests show the presence of coliform (bacteria) or nitrates, your drainfield may be failing

Lush green grass over the drainfield, even during dry weather

Cesspool Systems

The basic component is a cesspool, typically made of open concrete blocks laid in a circular pattern with a concrete cover. Here is the how the cesspool system works: Waste flows from the home into the cesspool. Organic solids float to the top and inorganic solids sink to the bottom of the tank. Natural occurring bacteria in the cesspool converts the organic solids to liquid. The clear liquid flows out the sides of the tank and into the surrounding soil.

How does a Cesspool system fail?

Solid buildup is again the problem! By not servicing and maintaining your system properly, solids build up within the tank and clog the pores of the cesspool walls. This will prevent liquid from escaping the tank into the surrounding soil. In addition, the presence of inorganic household substances in the tank, like toilet cleaners, bleach, and anti-bacterial soaps will also turn into solids, clog the cesspool walls, and cause a system overflow.

The most important step to maintaining your septic tank is to remove sludge and scum build-up before it washes into the drainfield. How often your cesspool or tank needs pumping depends on the size of the tank, the number of people in your household, the volume of water used, and amount of solids (from humans, garbage disposals, and any other wastes) entering the system. Generally, tanks should be pumped every 3 to 5 years.

A failing system can become a source of pollution and public health concern, causing property damage, ground and surface water pollution and disease outbreaks. Once your septic system fails to operate effectively, you may need to replace it, costing you thousands of dollars. Plus, if you sell your home, your septic system must be in good working order. It makes good sense to understand and care for your septic system. Septic and cesspool systems are designed to provide long-term, effective treatment of household waste when operated and maintained properly.

THE HISTORIC BENEFITS OF SHELLFISH

By Ed Carr, Village Historian

In the Summer of 1894, a local bayman, Stanley Lowndes, received a lease from the State of New York to harvest oysters and clams from Long Island Sound. Lowndes used a steam driven oyster dredge to work the bottom of the Sound between Eaton's Neck and Lloyd Neck beginning where the New York and Connecticut state line exists in the middle of Long Island Sound and then working his way south. By the Autumn, his dredge had proceeded into the "grey" area where Long Island Sound turns into Huntington Bay between Eaton's Neck and Lloyd Neck.

The Town of Huntington noticed Lowndes moving further and further south, and ordered him to stop. The Town Attorney stated that the Town Trustees

owned the bottom of Huntington Bay, not the State of New York. Lowndes replied that he thought he was still in Long Island Sound, and not quite in Huntington Bay. The Town then initiated a lawsuit against Lowndes, and the State of New York jumped into the suit joining with Lowndes. The State's position was to question the very validity of the Town's claim to "own" the bottom of the Huntington and Northport Bay Complex.

The lawsuit moved through the courts, and eventually went to the United States Supreme Court in Washington, D.C. The United States Supreme Court

ruled that the colonial patents held by Huntington were valid, so that the Trustees rightfully owned the Bay and Harbor bottoms in the Township. The Supreme Court also drew a very definitive demarcation line starting at Target Rock on Lloyd Neck, and heading in a north-east direction to a monument near what is today "Coast Guard Cove." This line became known as the "Lowndes Line" and separated the Town's underwater lands of Huntington Bay from the bottom of Long Island Sound owned by the State of New York.

Intertidal marsh eel-grass is an important part of shellfish reproduction and a healthy harbor

Please turn to Page Eleven

BENEFITS OF SHELLFISH *continued.*

In the Lowndes lawsuit, the Huntington-Northport Bay Complex was described as the most abundant shellfish producing area along the entire North Shore of Long Island from Flushing to Orient. Today, however, the complex is a mere shadow of its former self. Neighboring Oyster Bay currently produces a shocking 90% of the oyster harvest in New York State. Our complex produces very little. This change is due to the poor water quality that has plagued our area for decades.

Only recently, local governments are beginning to address this issue with a host of initiatives. There are new sanitary and cesspool standards, shellfish beds are being re-stocked using aquaculture, sewage treatment plants are being upgraded, and more storm water runoff is being captured before making its way into the harbors. Communities are also working to dredge areas to increase depths and tidal flushing.

Shellfish play a vital role in cleaning up the waterfront. They are nature's "natural" filters. They pulsate, filtering in 30 to 50 gallons of seawater each day, and consume algae in the process. The abundance of shellfish is what historically kept our harbors and bays clean for centuries, and their positive effect on local estuaries cannot be understated. Returning the Huntington- Northport Bay Complex back to the condition it was in when Lowndes plied the harbors and bays is a lofty goal, and will ultimately benefit everyone who uses and enjoys the waterfront.

SPRING IS COMING

By Joan G. Hauser, Editor

Despite much too much of that obnoxious white stuff, don't give up! One of these days, snow will disappear till next year and Asharoken will turn green again. Here's a list of of things to do when the new season arrives.

EARLY APRIL

- Plant trees and shrubs**
- Re-seed areas on the lawn as long as it is not muddy**
- Prepare the soil in vegetable and annual beds**
- Sow seeds of garden peas, sweet peas, and radishes**
- Fertilize fruit trees**

MID APRIL

- Set out strawberries and protect them with mulch**
- Plant new roses**
- Prune early flowering shrubs immediately after flowering**
- Plant and divide perennials through the middle of May**
- Sow seeds outdoors of hardy annuals, such as cornflowers, larkspur, annual poppies**

MAY

- Second and third sowings of vegetables for continual fruition**
- Plant dahlias, cannas and daylilies**
- Stagger planting of gladiolus through late June**
- Sow seeds of lima and green beans, corn, tomatoes, eggplant, peppers, cucumber, and squash**
- Fertilize roses every two to three weeks**

JUNE

- Remove old flowers but not foliage from spring bulbs**
- Prune shrubs after flowering**
- Late June is the last chance to fertilize trees and shrubs**
